

Certainly we all understand the FCC's concern, however the additional requirement to tape all programming will only tax our limited resources and hamper our efforts to serve the public with quality local news and information. Needed staff will be assigned the added task of filing tapes and keeping needless records, which may never be used. It is very rare an FCC licensed station broadcast obscene or indecent language. Why put such an extreme burden on all stations in an effort to discipline a few? The record is clear that local broadcasters in general do an outstanding job supporting their communities. Any additional needless requirements will only hurt our efforts to better serve our viewers.
